Host: China Communications and Transportation Association

Organizer: China Logistics Times

Co - host: China National Machinery Industry International Co., Ltd.

EXHIBITION OVERVIEW

Strengthen logistics infrastructure to boost global competitiveness

● A professional brand forged by 30 years of industry dedication

Founded in 1997, the China International Transportation & Logistics Expo has run for 22 sessions over nearly three decades in cities including Beijing, Shanghai, Guangzhou, Chengdu, Nanjing and Jinan. Each edition draws numerous well-known domestic and overseas enterprises, making it a highly influential comprehensive exhibition for China's transport and logistics sector.

● Settle in the Central China to seize development opportunities

For the first time, this expo is hosted in Zhengzhou Airport Economy Zone. Leveraging its strengths as a pilot zone for the Air Silk Road, national airport economic pilot area and modern international logistics hub, it unlocks brand-new market potential for central China's logistics, cross-border trade and hub economy, enabling industry players to grasp strategic opportunities brought by the rise of the Central China.

● Full-industry exhibition zones to boost commercial cooperation

The expo features eight core themed zones: integrated logistics, multimodal transport, green logistics, smart digital logistics, air freight, port & shipping logistics, land transport and cold chain logistics. Two special zones for low-altitude economy & general aviation, as well as intelligent commercial vehicles and auto parts are also arranged, covering the full industrial chain of modern logistics.

EXHIBITION OVERVIEW

Bridge to connect global logistics hub networks

Organized by China Communications and Transportation Association, planned and operated by China Logistics Times Magazine, and co-hosted by China National Machinery Industry International Co., Ltd., the expo takes "New Hub of the Silk Road, New Impetus for Logistics" as its theme, with a total exhibition area of 50,000 sq.m. It integrates exhibition, exchange, business matching and signing in one venue. Supported by full-scale multi-media promotion, the expo is widely recognized across the industry for its strong industrial cohesion and upgraded quality, hailed as the "Weather Vane of China's Logistics Industry".

EXHIBITION LAYOUT

Parallel Themed Events: Tap Vertical Industrial Tracks with In-depth Expertise

Low-Altitude Industry & General Aviation

Centered on compliant operation and large-scale commercialization of low-altitude economy, this zone covers the full industrial chain including aircraft R&D, airborne avionics & power systems, airspace & airport support, and multi-scenario operation services. It empowers manufacturers, airspace management institutions and low-altitude operators to conduct technical exchanges and implement project cooperation.

- Complete Aircraft & Core Systems
- Infrastructure & Operation Support
- Scenario Applications & Operation Services

Intelligent Commercial Vehicles & Auto Parts

Focusing on the electrification, intelligence and connectivity transformation of commercial vehicles, this zone showcases the full innovative industrial chain covering complete vehicles, core components and after-sales maintenance services. It systematically exhibits core technological achievements including battery-electric/hydrogen power, autonomous driving and intelligent connectivity, as well as after-market service solutions.

- Long-Haul Heavy-Duty Trucks
- New Energy Light Trucks for Urban Distribution
- Core Auto Components
- Special Supporting Parts & Maintenance Consumables

Scenario Demon & Interactive

Physical equipment demonstrations will be staged for core business scenarios including long-haul transportation, urban distribution, multimodal transport, warehouse & distribution in logistics parks, last-mile delivery and terminal operation & maintenance. The displays highlight the engineering adaptability and overall on-site operational efficiency of smart warehousing systems, automated handling equipment, autonomous last-mile delivery vehicles and intelligent dispatching platforms.

- Intelligent Logistics Equipment Live Demonstrations
- Scheduling of L4 Autonomous Last-Mile Delivery Vehicles
- Collaboration of Digital Twins and Intelligent Algorithms
- Driving Experience of Commercial & Special Vehicles

Innovation Achievements in Transportation

Centering on the practical demands of the transportation sector, this zone focuses on green transport, smart logistics, transport equipment, safety operation and maintenance. Based on minor inventions, technical renovations, innovative improvements and original designs, it builds an industry-university-research collaborative innovation platform integrating competition exhibit display, university-enterprise technical matching and commercialization of innovative projects.

- Green Transport & Low-Carbon Technologies
- Smart Logistics & Digital Supply Chains
- Transport Equipment & Vehicle Engineering
- Safety Operation, Maintenance & Risk Prevention & Control

EXHIBITION SERVICES

Industry Synergy, Shared Value

Drawing on our long-standing accumulated industry resources, we center our services on "Precise Matching & Practical Deal Conversion". We have built a full-chain supply-demand matching service system covering pre-show targeted invitations, on-site business negotiations and post-show follow-ups. This enables exhibitors to efficiently reach target clients, extending exhibition value beyond booth displays to full-cycle commercial gains.

Closed-Loop Service

■ Pre-Expo

Conduct demand research and organize targeted professional buyers.

■ During Expo

Arrange one-on-one supply-demand matching and facilitate cooperation intent signing.

■ Post-Expo

Provide sustained follow-up services to turn intended cooperation into formal orders.

Leadership of Benchmark Enterprises

Led by leading industry players including China Logistics Group, Sinotrans, COSCO Shipping Logistics & Supply Chain, CRRC, China Railway Container Transport, China Railway Express, China Eastern Airlines Logistics, SF Express, JD Logistics and Cainiao Group, the expo focuses on core sectors such as cross-border e-commerce, commercial circulation, cold chain logistics, multimodal transport and smart supply chains.

Achievements & Statistics

150+ New technologies

New products and new application scenarios released cumulatively

500+ Letters
